

I. Amendments to the Specification

Please replace paragraph [0027] on pages 7 and 8 of the present application as filed with the following amended paragraph:

[0027] Venting valve 48 includes valve body or housing 60 having top portion 62 and neck portion 64 extending from top portion 62. As shown, neck portion 64 includes a radial wall integrally extending from top portion 62 to define an inner space 66 in neck portion 64 in which spring and float assembly ~~[[96]]~~ 98 is housed as discussed below. As shown, port 76 extend from neck portion 64, wherein port 76 is disposed below top portion 62. Neck portion 64 engages retention member 53 in circle portion 44. As shown, neck portion 64 is configured to have dimensions or a shape complementing but slightly greater than circle portion 44. This allows neck portion 64 to be frictionally retained in circle portion 44.
